

KASIA KEDZIERSKA

For my PhD @ **University of Oxford**, I studied cancer of the uterus and chromatin organisation in disease progression. Over the summer, I joined the **bioML team** at the **Microsoft Research New England** as an intern where I worked on **Foundation Models** in single-cell biology. Previously, I worked with **NLP methods** and knowledge graphs during my internship @ **Novo Nordisk Research Centre in Oxford**. Using **Transfer Learning** and **YOLO model** I built a framework to identify sea pens from a video footage of an ocean floor @ **Turing Data Study Group**.

With extensive domain knowledge in **Computational Biology** complemented by my experience in **Data Science & Machine Learning** I am eager to drive advancements at the crossroads of these disciplines.

SELECTED WORK EXPERIENCE

- 2023** Intern @ **Microsoft Research New England**, Cambridge, Massachusetts, USA
During the summer I investigated the potential of the **Foundation Models** in the space of single cell biology. I was mentored by **Alex Lu**, **Ava Amini**, and **Lorin Crawford**.
- 2021** Intern @ **Novo Nordisk Research Centre Oxford**, Oxford, United Kingdom
I worked with **NLP and knowledge graphs** to screen **biomedical articles** to identify and prioritise therapeutic targets. To increase the impact of the analysis and increase reach I built and deployed an **interactive dashboard** (using **R Shiny**) to allow colleagues within the company to investigate and visualise the results directly in real-time.
- present | 2018** DPhil Researcher @ **Wellcome Centre for Human Genetics, Big Data Institute, University of Oxford, UK**
In my PhD project I'm looking at how **chromatin organisation** influences **disease initiation and progression** in uterine cancer using multimodal data. Currently, I'm working on building and refining ML models of **cancer evolution**, specifically identifying evolutionary trajectories in the cancer of the uterus.
- 2018 | 2017** Visiting Graduate Student @ **Ratan group, University of Virginia, USA**
I carried out the research for my Master thesis *Analysis of the mutational burden across gene sets in cancer* in which I modeled **somatic mutations** background distribution using **germline variation**. I also developed **SONICS** - algorithm to genotype Short Tandem Repeats (STRs) using dense forward simulations of the polymerase chain reaction (PCR).

EDUCATION

- present | 2018** DPhil in Genomic Medicine and Statistics @ **Nuffield Department of Medicine, Brasenose College**
PhD fully funded by the **Wellcome Trust Four-year PhD Studentships in Science**
- 2018 | 2015** M. Sc. Eng., Biotechnology @ **Warsaw University of Technology**
